Propagation Watch

Conditions on 160 meters on Sunday of the CQWW 160-meter CW test were remarkable. G3LNS reports working most of the WØ and W7 states, and California, in what he describes as the "most fantastic conditions I have even heard on 160 meters." George is only five states short of working all states on 160. (DXNS.)

Also, Pres Smith N6SS reports what may be the first long-path contact between North America and Europe on 160 meters. OH7MS responded to N6SS's CQ test at 1408Z on Sunday, Jan. 29, a few minutes before sunrise at Pres's Arizona QTH and at sunset in Finland. The OH's signals peaked on the SW beverage, at a time when Pres reports loud echoes in the same direction. VQ9TP copied both ends of the QSO. W7XR worked OH7MS and some other Scandinavian stations a few minutes later, also on long path. Any Top Bander have any more information on such long-path contacts?

The propagation forecast for the next week is excellent. Look for good conditions on 160-17 meters. Good hunting!
